SUMMARY

Software Developer with hands-on experience building full-stack web applications using Java, Spring Boot, and React.js. Proficient in RESTful API development, MySQL database management, object-oriented programming, and software development life cycle (SDLC). Strong algorithmic problem-solving ability developed through competitive programming. Effective communicator and cross-functional collaborator with a keen attention to detail, seeking to contribute to high-impact engineering teams.

EDUCATION

JSS Academy of Technical Education

Bachelor of Technology – Electronics and Communications Engineering

Noida, India

Aug. 2022 – Aug. 2026

EXPERIENCE

Infosys Springboard

Java Full Stack Developer Intern

Virtual (Remote)

Nov. 2025 – Jan. 2026

- Collaborated with cross-functional teams to design and develop "ResolveIT," a full-stack web application using Java Spring Boot, with role-based access control (Admin, Staff, User) meeting all business and quality requirements.
- Implemented Spring Security with JWT (JSON Web Tokens) and custom OncePerRequestFilter, enforcing stateless authentication and secure API access across all user sessions.
- Designed normalized MySQL database schemas to manage complex relationships between users, complaints, and status logs, improving data retrieval performance for the admin dashboard.
- Developed and deployed RESTful APIs for file uploads (images/PDFs) and CSV/PDF analytical report generation, enabling data-driven decision-making.
- Engineered an automated escalation logic engine using timeline-based triggers and hierarchy notifications, reducing manual complaint resolution overhead.
- Conducted unit testing and debugging of backend services to ensure application reliability and performance under load.

PROJECTS

[ResolveIT](#) | Java, Spring Boot, Spring Security, MySQL, JWT, REST API

Nov. 2025 – Feb. 2026

- Designed and implemented frontend and backend components for a grievance management system with three-tier role-based access control and stateless JWT-based authentication.
- Optimized MySQL schema for high-throughput queries; built RESTful APIs following software engineering best practices for scalability and maintainability.
- Implemented Spring Framework security with custom filters and role-specific endpoint authorization, ensuring secure and reliable application behaviour.

[Interactive Web Portfolio](#) | HTML, CSS, JavaScript, React.js

2026

- Built a responsive single-page web application using JavaScript and React.js, applying component-based architecture and performance optimization techniques.
- Delivered consistent cross-device user experience through responsive design, showcasing projects, skills, and competitive programming achievements.

ACHIEVEMENTS

- Codeforces **Pupil** peak rating **1364**, ranked **1445th globally** in Codeforces Round 984 (Div. 3), demonstrating strong algorithmic problem-solving and analytical thinking.
- CodeChef **3-Star** coder peak rating **1696**, ranked **94th globally** in Starters 160 Division 3, reflecting consistent competitive programming excellence.
- Ranked **6262 globally** in Meta Hacker Cup 2023 among worldwide participants, showcasing adaptability and coding skills under pressure.

TECHNICAL SKILLS

Languages: C/C++, Java

Core CS & Systems: Data Structures & Algorithms, Object-Oriented Programming, Linux

Backend & Databases: Java Spring Boot, REST APIs, MySQL, JWT Authentication

Frontend: HTML, CSS, React.js (Working Knowledge)

Developer Tools: Git, GitHub, Performance Optimization

Soft Skills: Collaborative, Articulate, Meticulous, Resilient, Adaptable
